How active is your fund manager? A new measure that predicts performance

[KJM Cremers, A Petajisto - The review of financial studies, 2009 - academic.oup.com](#)

We introduce a new measure of active portfolio management, Active Share, which represents the share of portfolio holdings that differ from the benchmark index holdings. We compute Active Share for domestic equity mutual funds from 1980 to 2003. We relate Active Share to fund characteristics such as size, expenses, and turnover in the cross-section, and we also examine its evolution over time. Active Share predicts fund performance: funds with the highest Active Share significantly outperform their benchmarks, both before and after ...

## On the industry concentration of actively managed equity mutual funds

[PDF] nber.org

[M Kacperczyk](#), [C Sialm](#), [L Zheng](#) - The Journal of Finance, 2005 - Wiley Online Library

Mutual fund managers may decide to deviate from a well-diversified portfolio and concentrate their holdings in industries where they have informational advantages. In this paper, we study the relation between the industry concentration and the performance of ...

## Mutual Fund's $R^2$ as Predictor of Performance

[PDF] nyu.edu

[Y Amihud](#), [R Goyenko](#) - The Review of Financial Studies, 2013 - academic.oup.com

We propose that fund performance can be predicted by its  $R^2$ , obtained from a regression of its returns on a multifactor benchmark model. Lower  $R^2$  indicates greater selectivity, and it significantly predicts better performance. Stock funds sorted into lowest-quintile lagged  $R^2$  ...

Luck versus skill in the cross-section of mutual fund returns

[PDF] amazonaws.com

EF Fama, KR French - The journal of finance, 2010 - Wiley Online Library

The aggregate portfolio of actively managed US equity mutual funds is close to the market portfolio, but the high costs of active management show up intact as lower returns to investors. Bootstrap simulations suggest that few funds produce benchmark-adjusted ...

False discoveries in mutual fund performance: Measuring luck in estimated alphas

[PDF] unige.ch

L Barras, O Scaillet, R Wermers - The journal of finance, 2010 - Wiley Online Library

This paper develops a simple technique that controls for “false discoveries,” or mutual funds that exhibit significant alphas by luck alone. Our approach precisely separates funds into (1) unskilled, (2) zero-alpha, and (3) skilled funds, even with dependencies in cross-fund ...
